Art Unit: 1793

Claims 5-17 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

It is noted that in claim 1, line 2, the word “treating” is duplicated and should be deleted.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-4,18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over El Kadi '277 or SU 430060 or BR 9701866 or McGrath et al.

Art Unit: 1793

Each of El Kadi and SU '060 and BR '866 and McGrath et al., teaches or at least suggests the instantly claimed process of treating various streams of the Bayer process including the liquor, the precipitated alumina trihydrate, and collector material, such as sodium hydroaluminosilicate. See col. 4 of El Kadi; the abstract of each of SU '060 and BR '866 and pp. 35-37 of McGrath. The taught process of treating with ultrasonic energy, being the same as instantly claimed, would also destroy organics absent a showing to the contrary.
